# CUBIQ® one

## Compact, light and easy to install!

Optimizes the productivity of the operations of the logistics chain of your company up to 18% with a technological and innovative device that transforms the results of logistics chains into industries such as transporters, Freight forwards, Couriers, cargo consolidators, airlines and retail.

**CubiQ One** is a device developed to the highest standards quality. What makes it a fundamental tool for the dimensioning of merchandise and the transformation of routine processes making them agile and efficient.

---

## CUBIQ® one

### Measures, weighs and takes a photo of the product in just 1 second!

It is a mobile device (hardware and software) capable of measuring objects of any shape and type, with a limit of 59in per edge; based on artificial intelligence and vision, with which we automate the process of dimensioning, weighing and transcription data in less than **1 second, with 99% accuracy.**

### Benefits

✓ Standardization in measurement processes
✓ Decreased inefficient times up to **200%**
✓ **Freight reduction** up to **8%**
✓ **Space optimization** up to **25%**
✓ **Traceability in shipments**
✓ Custom metrics and reports
✓ Make the operation efficient and increase your profits
✓ Recognizes the characters on the label, eliminating the manual digitization of the information (with the OCR upgrade).

⚡ **Quick**

💡 **Easy**

🛡 **Insurance**

🎯 **99% accuracy**

📊 **Higher productivity!**

---

## The best ally for your company!

### Features

● It measures
● Weighs
● Stores in the cloud
● Takes pictures
● Reads barcodes
● Recognizes label characters (OCR)

### Technical specifications

**Accuracy**
99% accuracy in all the measurements, certified by NTEP.

**Maintenance**
Sealed unit, no mobile parts. It does not require maintenance.

**Requirement of installation**
None. Operation Immediate.

**Information collected**
Measurements of each edge (height, width and length) image and weight of the object.

**Compatibility**
With any scale and barcode reader scanner with serial communication.

**Maximum measurements**
59in x 59in x 59in

**Speed**
1 second of measurement and data capture. 1 cm accuracy for any object.

**Power**
110 VAC.

---

## Hardware and Peripherals

**Screen**
Touch screen 15" with installation base.

**CubiQ (Camera)**
1 perfectly calibrated camera, with resolution of 640 x 480 pixels.

**Estructura**
Ceiling - wall
*(there are other structure options, They are quoted separately).

**Processing**
1 processing unit.
