

Benefits with CUBIQ[®] go mini!

- ✓ Promote **self-management** in your customers and employees by **eliminating contact**.
- ✓ **Streamlines lines** at shipping and receiving points of goods.
- ✓ Allows the **measurement and weighing** process to be carried out of the goods, **data entry, payment and label printing**.
- ✓ It makes the operation efficient and **increases your profits**.

CUBIQ[®] go mini!

The **PERFECT** solution for making shipments, without the need for interaction!

INDUSTRIES:

Warehousing and couriers

Retail

Freight forwarders

Airlines

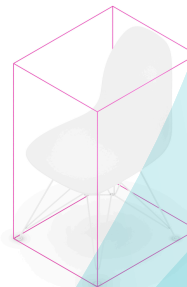

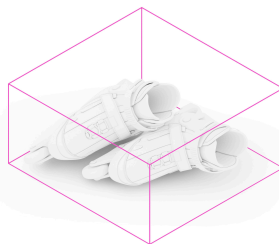

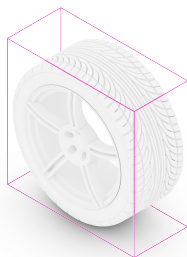

Self-service shipping module. It allows to make the process of reception of merchandise in an automatic and novel way **without the need of personnel for the attention of the client**.

With this **NEW device**, companies provide their users with facilities for sending packages, **reducing contact with people**, completely changing the dynamics of the logistics sector and the **experience of the end user**.

It is **small, easy to use** and has our cubing system, capable of measuring objects of up to 39 in, based on intelligence and artificial vision, which will make the **exact charge for the shipment of the goods according to size and weight**.

Functions

- It measures
- Weighs
- Takes pictures
- Charges payment
- print the label

APPLICATIONS:

- ✓ Reception and delivery of goods.
- ✓ Traceability of shipments.
- ✓ Planning efficient routes.
- ✓ Operator Productivity.
- ✓ Space optimization.
